

**THE BANK OF TENNESSEE.**—The Nashville Banner says: We have examined its late report with care. It has made and paid over to the Treasurer within the last two years a net profit of \$416,799 18 on an actual capital of \$2,389,952 54.—This is very large profit—much larger than is usually exhibited by banking institutions in Tennessee, the exports and imports of which are not so favorable to large banking profits as in the commercial and manufacturing States of the Union.

The suspended debt of the Bank or debt in suit has been reduced, within the two years, \$94,628 75. The cash on hand is \$945,750 90—circulation \$1,757,103 00—not too one to the actual cash in the vaults. That is a very favorable condition.

The Bank has furnished the very large amount of \$4,290,639 50 in exchange to citizens within that time.

**EXPLOSION. ATTENDED WITH LOSS OF LIFE.**—An accident occurred on our Rail Road, on Friday night last, which, we are sorry to say, caused the death of three individuals in the service of the Company. The new locomotive *James L. Pettigrew*, to which was attached the night train of Freight and Passenger Cars, in which were several Passengers, left Hamburg for this city on their way down. When in the vicinity of White Ponds, about 17 miles this side of Aiken, the boiler of the locomotive exploded, which caused the instantaneous death of Mr. Philip Scholle, the Engineer, and the two Firemen in attendance, viz: Frederick Kruse and B. Brother. The bodies of these unfortunate men were thrown some distance from the track, and were dreadfully mutilated. The boiler head was found about 400 yards distant from the scene of disaster.

**SAN FRANCISCO, Oct. 1, 1851.**  
**DEAR SIR:—Mirabile Dictum!**—Nothing eventful in California for fifteen days past! Not a man, woman or child has suffered under the unwritten code of Judge Lynch! We pray we may have no more revolutionary times, such as we have passed through in the last four months.—Everything appears indicative of peace. The mining and mechanical classes are prospering, and merchants are in better humor. Money is plenty in the better.

Col. John Bigler is our Governor elect by about 1000 majority. The Legislature a decided democratic majority. It is thought that David Bordenick, a New York, Five points "bully" will be elected to the U. S. Senate creating of course, considerable ambition in the bosoms of his old companions of that classic ground.—Some half dozen native Californians are elected to the Legislature—none of whom understand, nor speak a word of English. Yours, truly, J. K. McC.

P. S. I have not time to write at length. Will do so Oct. 15.—Nashville Gazette.

Chicago, Illinois, is quite an important point for the packing of beef.—During the last year 59,000 barrels of beef were packed at the different establishments. The number of cattle slaughtered was 30,800; the number of barrels of tallow produced is estimated at 7,312; the number of tons of salt consumed was 2,022; the hides will weigh 1,232 tons, and are valued at about \$111,000. The number of hands employed in slaughtering and packing is 463.

**GLASS FACINGS FOR BUILDINGS.**—A correspondent of the London Builder suggests the substitution of glass for the stone facings of buildings; not translucent or crystal glass, but glass ground, of the requisite thickness and strength. Such a material, he adds, would not absorb the dust and smoke constantly floating in the air; but every shower would wash them off, and buildings would look as fresh and new as ever. And as glass, from recent improvements, can be moulded to any shape, almost as perfectly as if cut, the most exquisite Gothic and other ornaments could be produced.

Prof. Julius Caesar Hanibal, in his discourse in the New York Picayune, on "De Possum," says:  
"De possum am a animal de same as man, and he hab a grate many ob de tricks ob man one ob de tricks dat dey larned from man am de trick ob dayin' out all nite, for you must noe dat Mr. Possum sleeps mos all day and den loaf 'bout in de nite time, derefore dat am de reason dat dey am hunted in de middle of de nite jis like de coon."

How pleasant, when one is lying in full gaze of the voluptuous moon, counting the jewels that flash in the deep blue sky with a heart entranced by adoration, is it to feel a bed bug, as big as a sea turtle, rooting into the middle of your back, and hear about forty of the "ancient regime" galinippers, singing "Scots wa ha wi Wallace bled," outside of your mosquito bar.

**THE BABY-JUMPER BEAT.**—Some cute Yankee in Boston has invented and brought out a grand concern for nursing infants.

You put your squaller into the machine, and, by a series of straps, cogs, and screws, agitated by the spasmodic splurges of the infant's arms and legs, the machine rolls gently over the floor, while a species of hand organ music is emitted, equaling ten penny whistles and a dozen baby's rattles. If this fails to amuse the little "sugar-lump," you may turn a screw and set in motion a manipulator, something like a human hand, which "by-by's" the "mudder's box of diamonds," tickles and pats it until it roars with laughter or goes to sleep! We believe the inventor intends to make sundry additions to his baby-nurse, whereby it may dress and undress the youngster, feed it, wash it, &c. If these Yankee keep on a spell longer, the men may shut up shop and go a fishing, while the women lie back in white kids and play overtures on the accordion or piano. This equals the patent "clequer," and knocks the telescope, for seeing through a brick, clean into the "Fourth of July."

**PAY AS YOU GO.**—The famous rule laid down by John Randolph, for promoting prosperity and fortune, is perhaps the simple secret for effecting the entire reform of social society.—Pay as you go! Pay what? Your debts?—well? These debts include, not only what you owe to man, but to your country;—not only what you owe to your country, but to yourself;—not only what you owe to yourself but to God, the greatest of all creditors. Pay your fare; your tailor; your washerwoman; and, before all, your printer! Your debts to society are included in the virtues of forbearance, charity, public works; to your country, patriotic self-sacrifice, and the devotion of your mind, body and time, on all occasions of public exigency. To yourself, in doing justice to your natural endowments, your conscience and all proper and pure sensibilities. To God, for all that you have, according to the laws he has prescribed. Prayer, forbearance, love to your fellows, faith in the world's great Governor, and a perfect resignation to his will! Properly considered, this simple rule—"Pay as you Go,"—involves all the duties to yourself, to society, to the country, the laws and religion.

**TO CURE A FELON.**—Take one table spoonful of red lead, and one table spoonful of Castile soap, mix them with as much weak ley as will make it soft enough to spread like a salve, and apply it on the first appearance of the felon, and it will cure it in ten or twelve hours.

**GRAPHIC.**—Dickens, in one of his inimitable tales, in the course of a dissertation on railroads, gives the following graphic description of a locomotive and its music:

"As to the engine, a nasty, wheesin creakin, gaspin, puffin, bussin monster, always out of breath, with a shiny green and gold back, like an unpleasant beetle in that 'are glass magnifier; as to the engine, as is always a pourin' out red hot coals at night, and black smoke in the day, the sensiblest thing it does, in my opinion, is ven there is something in the ray, and it sets up that ere frightful scream, vich seems to say—'Now here's 240 passengers in the werry great'st extremity of danger, and here's their 240 screams in vun.'"

John M. Thurston, who killed his brother-in-law, has been found guilty of murder in the first degree, at Oswego, N. Y. This is rather a singular case. It was proven, by various witnesses, that the prisoner was a strong abolitionist, and very eccentric in his religious views; and had frequently expressed his belief, that "it was a less crime to shoot a man than to vote for a slaveholder or a liquor seller." Unfortunately for himself, he put his theory in practice; the plea of insanity had no effect on the minds of the jury, who had sworn to render a verdict in accordance with the evidence; and the result of his misguided principles is the gallows. The case of the miserable man should be a warning to the destructive fanatics, throughout the country, who preach resistance to the laws of both God and man, and who would delight in ridding the earth of all persons who do not approve of their peculiar notions of society, morality, &c.

**MUNICIPAL.**—Col. Horace L. Kinney, the great land owner, offers Kossuth and his companions, ten thousand acres of land in Texas, if they desire to locate in that country. The land is situated on the Nececes river, and as fertile as any in the United States.

**NEGROES.**—We learn by the Oregon Spectator, that there is a statute prohibiting the introduction of negroes into that territory, and that the law is enforced. Thirty days are allowed them to clear the territory.

A Yankee who lately removed to Wisconsin writes to his brother in Massachusetts, that the section where he resides is in a highly prosperous condition. He says that but one failure has ever occurred in his country, and in that case the man paid one hundred and twenty-five cents on the dollar.

Mrs. Stanton says that "what men can do, women can do." She should have added—with the single exception of straddling a fence gracefully.

"Look up!" thundered the Captain of a vessel, as his boy grew giddy while gazing from the top-mast.—"Look up!" The boy looked up and returned in safety. Young man, look up and you will succeed. Never look down and despair. Leave dangers uncared for and push on. If you falter, you lose. Look up! Do right and trust in God!

It Won't Do.—It won't do for a man to fancy a lady in love with him because she treats him civilly or that she has virtually engaged herself to him because she always endured his company.

It won't do to be desperately enamored of a pretty face till you have seen it at the breakfast table.

It won't do for a man to bump his head against a post, unless he conscientiously believes that his head is the hardest.

It won't do to crack jokes on old maids in the presence of unmarried ladies who have passed the age of forty.

The principle of vitality is a most mysterious thing, and often excites wonder by the tenacity it evinces—the obstinate hold it has upon some bodies. A hen will hop round for some time after her head is cut off, and a turtle or a worm seldom dies in a hurry. Eels are, perhaps, the most remarkable instances of this tenacity of the vital principle, and we suppose all people have heard of their squirming round in the frying-pan after they have been stripped of their great coats, cut up and boiled in veal. The most surprising instance of eel-vitality we have ever heard, was the case of one which was skinned and had its hide attached to the joint of a farmer's tail. So insistent with life was the eel-skin, that it worked the tail alone for several weeks, and the farmer looked on at his ease, wondering at the beauties of nature.

**FORGIVENESS.**—He who will turn away a friend for one fault, is a stranger to the best feelings of the human heart. Who has not erred at least once in his life? If that fault were not overlooked, to what depths of infamy would not thousands have descended? We do not know the peculiar temptations to which another may be exposed. He may have fought manfully against the sin, and still kept the secret locked in his bosom. At last he was overcome. In a moment he yielded. He would give worlds to recall the act. He has mourned over it in secret and repented in dust and ashes. Shall we forsake him? Earth and Heaven—Justice, Humanity, Philanthropy and Religion, cry out 'Forgive him!' He who will not forgive must possess the heart of a demon. Surely the love of God is not in him.

An Albany paper says: "We once saw a lady laced so tight, that while stooping to pick up a pin, her stays gave way, and she turned three summersets in consequence!"

Town Lots for Sale at Loudon, East Tennessee,  
(Now known as Blair's Ferry or Blairport)

ON Thursday, the 27th day of November next, will be offered at public auction, upon the premises, 200 Town Lots, suitable for business purposes or for private residences.  
LOUDON is situated upon the South bank of the Tennessee River, 50 miles, (by the river) below Knoxville, and 175 above Chattanooga. The East Tennessee and Georgia Rail Road, now in operation to Athens, 55 miles above Dalton, will be finished to Loudon, 25 miles further, by the first of March next.

This location offers extraordinary inducements to business men, as for several years it will be the terminus of the Rail Road, and will command in a great measure the trade of upper East Tennessee, and portions of Virginia, Kentucky and North Carolina. And from its position as the centre of a fertile and populous section of country, it must retain a heavy trade after the Rail Road is continued to and through Virginia. A very extensive and rich region of country, drained by the Clinch, the Little Tennessee, and the Tellico Rivers, all of which are navigable for steamboats, must always make this point its market, and it must also command a large portion of the boating trade of the Tennessee River above Chattanooga. The ease of access by navigable rivers to Loudon from the immense iron and coal beds for which East Tennessee is noted, renders it a most favorable location for manufacturing purposes and strong inducements will be offered by the proprietors to those who wish to engage in manufacturing.

The situation is healthy and desirable as a place of resort from the lower country in the Summer months.  
Further information can be obtained by letter or by personal application to Thos. H. Callaway, Cleveland, Tenn.; Major Richard C. Jackson, Athens, Tenn.; Sam'l M. Johnson, Midway, Monroe county, Tenn.; or to Maj. William Brown, or the subscriber on the premises, now known as Blair's Ferry, Tenn.
